PATIENT STORIES & TESTIMONIALS

Dear Dr. Waqar,

On behalf of my family, I wish to extend my sincere gratitude and appreciation for the professional service rendered during my recent medical check-up (≡/11/25) and subsequent procedure (≡/11/25) under your care . The level of attention, expertise, and compassion demonstrated throughout the process was truly exceptional.

The care I experienced both before and after the medical review was of the highest standard, and I felt reassured at every stage. I would also like to commend the Cath Lab facility, which was impressive and well-equipped, contributing greatly to the overall quality of care.

As a constructive observation, I would highly recommend the consideration of additional staffing support during procedures in the future. This would further enhance efficiency and ensure that the excellent standards of patient care are consistently maintained.

The care provided by staff at your ICU was of high standard too. Although, been alone in the ICU, staff were very caring and reassuring that I was in good hands to overcome any difficulties that may be experienced. I was relieved that no difficulties were encountered during my stay at PIH.

Once again, thank you for your dedication and professionalism. Please extend my appreciation to your team for their outstanding efforts.

Mr. Morea
